KNOWLEDGE MANAGEMENT (KM) COURSE OUTLINE

FOREWORD

Today's culture thrives on knowledge. Possessing knowledge gives advantages in making the right decision or strategy to implement. The Internet distributes knowledge at split-second rates. Laptops, tablets and smart phones bring knowledge to our fingertips. As the old adage says, "knowledge is power."

Organizations have a wealth of knowledge accessible through the people they touch internally, like employees, and externally, like customers. Organizations that allow knowledge to go unmanaged may be giving their competitors the upper hand in the market. The organization that is able to capture, store, and retrieve knowledge effectively is then capable of learning as an organization. A learning organization is one where employees are empowered to change and develop new methods, thoughts, and strategies that will advance the mission of their organization.

Knowledge Management is the establishment of a system that captures knowledge purposefully for incorporating into business strategies, policies, and practices at all levels of the company. This course will teach the learner how to initiate a knowledge management program at work. When it comes to knowledge management, any organization is able to implement a strategy. Wherever there are humans working together for one goal, there is knowledge to be harvested, stored, and dispensed as needed.

OUTCOMES

- ▶ Describe the concepts behind knowledge management
- ▶ Examine the Do's and Don'ts of successful knowledge management
- ▶ Interpret the knowledge management lifecycle
- ▶ Identify the knowledge management paradigm
- ▶ Learn about the knowledge management models
