 1.0 DAY COURSE

This Knowledge Management (KM) training course teaches you how to implement an efficient method of taking advantage of the knowledge assets and intellectual resources of the employees for organizational success. This Knowledge Management course from PD Training teaches the creation of a system that captures knowledge purposefully for incorporating into business strategies, policies, and practices at all levels of the organization.

This course helps construct the knowledge competence of the organization by improving, systematizing, retaining and making use of the intellectual resources of the employees. Such intellectual resources are acknowledged as an important competitive edge and a driver of effectiveness for every organization.

This course is available now throughout Malaysia, including Kuala Lumpur.

This Knowledge Management (KM) training course can be delivered at your premises by one of our expert local or international trainers or live online using our HIVE technology.

What You'll Gain:

Today's culture thrives on knowledge. Possessing knowledge gives advantages in making the right decision or strategy to implement. The Internet distributes knowledge at split-second rates. Laptops, tablets and smart phones bring knowledge to our fingertips. As the old adage says, "knowledge is power."

Organizations have a wealth of knowledge accessible through the people they touch internally, like employees, and externally, like customers. Organizations that allow knowledge to go unmanaged may be giving their competitors the upper hand in the market. The organization that is able to capture, store, and retrieve knowledge effectively is then capable of learning as an organization. A learning organization is one where employees are empowered to change and develop new methods, thoughts, and strategies that will advance the mission of their organization.

Knowledge Management is the establishment of a system that captures knowledge purposefully for incorporating into business strategies, policies, and practices at all levels of the company. This course will teach the learner how to initiate a knowledge management program at work. When it comes to knowledge management, any organization is able to

implement a strategy. Wherever there are humans working together for one goal, there is knowledge to be harvested, stored, and dispensed as needed.

Outcomes

- Describe the concepts behind knowledge management
