REQUEST QUOTE

0.5 DAY COURSE

Numerous organizations, business owners, executives and managers are aware of Lean Six Sigma as a term; however, they are not well-informed about what is it and how it can help improve their businesses. Lean and Six Sigma, both verified business improvement systems, offer businesses the techniques to maximize client and employee value by reducing process distinction and waste.

This Lean Six Sigma Awareness training course from PD Training presents a fundamental introduction to Lean Six Sigma. Business owners, executives or managers will be introduced to the five stages of the DMAIC (Define, Measure, Analyze, Improve and Control) development method, the statistical background of Six Sigma and the philosophy of Lean thinking.

This training course is available throughout Malaysia, including Kuala Lumpur.

This Lean Six Sigma Awareness Training Course can be delivered at your premises by one of our expert local or international trainers or live online using our HIVE technology.

Contact us today for a quote or enroll now into the next public course date.

What You'll Gain:

As a company implements a Lean Six Sigma Program it is essential all employees understand the objectives and terminology to be used.

This course helps demistify the terminology, and goals of SIx Sigma Continuous Improvement projects, thereby reducing fear, and empowering everyone to contribute.

Teams will be formed to conduct improvement projects. The "talk of the town" will be Lean Six Sigma. To engage all employees in the ground swell to improving all processes this course provides learning relative to terminology, objectives and the role each employee can play in this effort.

Outcomes

During this Six Sigma Awareness course participants will:

- Develop awareness Lean Six Sigma principals and goals.
- Increase their willingness and ability to contribute to Continual Improvement Projects.
- Develop an understanding of their role as a process team member, and how they can contribute to process re-design.
